

Google Home

Voice control set-up guide

Your guide to setting up Google Home to control your KASTA devices:

Part 1: Set up the Google Home app on your smart device (Page 2)

Part 2: Link your KASTA devices to your Google Home app (Page 4)

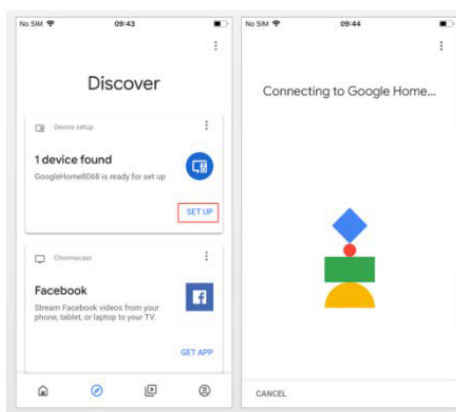

Part 1

Set up the Google Home app on your smart device

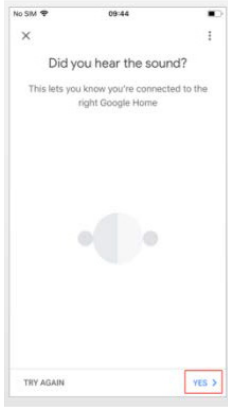

(You can skip this part and jump to Part 2 if your Google Home is already set up.)

1. Download Google Home from the App Store and create a Google account.
2. Open the Google Home app. Your Google speaker device will automatically appear on the “Discover” page.

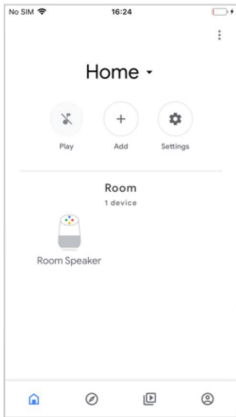

Select “SET UP” to start connecting to your Google speakers.

3. Select “YES” after you hear the voice prompts.

4. Follow the prompts in your Google Home app and you will eventually see your Google speaker set up within your Google Home app.

Part 2

Link your KASTA devices to your Google Home app

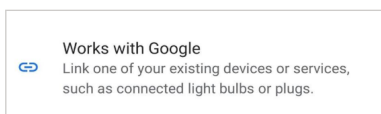

1. On the homepage of Google Home app select “+” in the upper left corner and if not already done, create a new home.

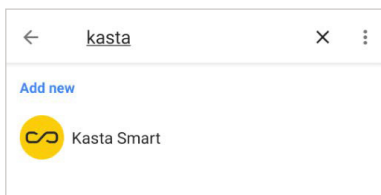

2. Now select “Set up device” under the “Add to home” heading.

3. Select “Have something already set up”.

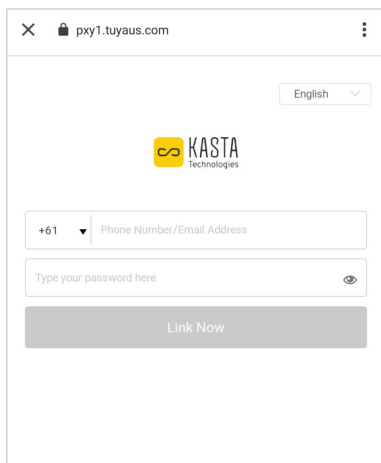

4. Search “KASTA” in “Add devices”.

5. Fill in the fields to allow Google Home to link to your KASTA app. Then select “Link Now”.

Instead of entering a phone number, enter the email address and password you used to create and login to your Kasta account.

The screenshot shows a mobile browser interface for the KASTA Technologies website. The address bar at the top displays 'pxy1.tuyaus.com'. Below the address bar, there is a language selection dropdown menu set to 'English'. The KASTA Technologies logo is centered on the page. Below the logo, there is a form with two input fields. The first field is for 'Phone Number/Email Address' and has a dropdown menu with '+61' selected. The second field is for 'Type your password here' and has an eye icon to toggle visibility. Below the input fields is a large grey button labeled 'Link Now'.

6. Complete! Return to the KASTA app.
