

for built-to-rent
apartments

Living Enhanced 

A photograph of a modern, multi-story apartment building with a glass and concrete facade. The building features numerous balconies with glass railings. A large, thick yellow curved line is overlaid on the right side of the image. The background shows a city skyline under a clear sky.

standard package

Simpler and smarter control solutions designed for residential apartments. The complete range of **KASTA** smart products offer simple luxury for an enhanced lifestyle.

KASTA Technologies' automation and control devices are completely modular without compromising on sophistication, and delivering an exceptional experience. The range is based on wireless technology and no additional cabling, unlike more complex systems on the market.

KASTA intelligent devices are IoT ready, completely scalable and seamlessly integrate into the automation platform ecosystem; allowing the customer to grow their automation and controls system as and when required.

Enjoy greater opportunity, engagement and the advantageous ability to stay connected to all residents throughout their lease term and beyond.

Be responsive to global trends and end user (homeowner) needs, i.e. meeting the demand and interest for smart home technology by using KASTA.

KASTA offers an attractive point of difference for property developers and builders, by reducing installation time and cost, and allowing for future scalability needs.

Deliver a standout value proposition on your development, a real point of difference in the market in your presentation – a competitive edge on other developments, furthering your offer beyond appliances, fittings, fixtures and finishes.

The unique way KASTA solutions are designed, means there is no extra requirements for specialists to be employed to install or program the system - any electrical contractor can do this. Further consideration has been made to eliminate the need for complex proprietary cabling.

APP CONTROL

Living Enhanced starts at your fingertips - just one touch can take control of your apartment ecosystem.

Compatible on both iOS and Android platforms across all smart phones and tablet devices.

Designed to work seamlessly throughout the apartment, connecting to smart devices and creating limitless possibilities to personalise and control your space in one simple, intuitive app: turn lights on/off, open/close curtains and blinds, control air movement and temperature, and much more.

VOICE CONTROL

Achieve effortless control by connecting smart speakers to your KASTA system. Control through a set of simple commands.

Available for both Google Smart Speakers and Amazon Alexa smart speakers.

Voice control allows users to control their KASTA system, hands-free.

SWITCH CONTROL

A traditional style of control with a premium look. The Hesperus™ series of switch interfaces offers remote control of your KASTA devices.

Choose from capacitive touch with haptic feedback or soft push button control.

This premium series features highly polished finishes in a range of luxury colours and slim 11-13mm plate depth. Offering a number of programmable button types and configurations, giving unparalleled flexibility and control over KASTA devices.

 **HESPERUS™** Series

The standard built-to-rent apartment solution.

A tailored solution including lighting, power, exhaust fan, air conditioning power and curtain/blind control, featuring the Hesperus™ Series of switch interfaces and powerpoints in combination with the ability to operate the system via the **KASTA** app, including remote access and also via voice control through smart speakers. This solution includes control devices suited to enhance the lifestyle of typical apartment living.

LIGHTING CONTROL

Locations: Main living areas (kitchen, dining, lounge), master bedroom, master ensuite and main bathroom

Using smart Hesperus™ series switch interfaces, we are able to achieve a simple yet dynamic lighting control system throughout the apartment, helping you to create the perfect mood for each room at the touch of a button.

POWER CONTROL

Locations: Main living areas (kitchen) and master bedroom

Using smart, safe Hesperus™ series powerpoints enables you to easily set up and manage electronic devices featuring individual outlet control, with increased energy-efficiency and premium safety features like child-lock.

AIR MOVEMENT CONTROL

Locations: Main living areas (kitchen), master ensuite and main bathroom

Manage your apartment energy consumption with air conditioning power and exhaust fan control. Add air movement devices to custom scenes with the ability to quickly change these settings through the KASTA app for different season requirements.

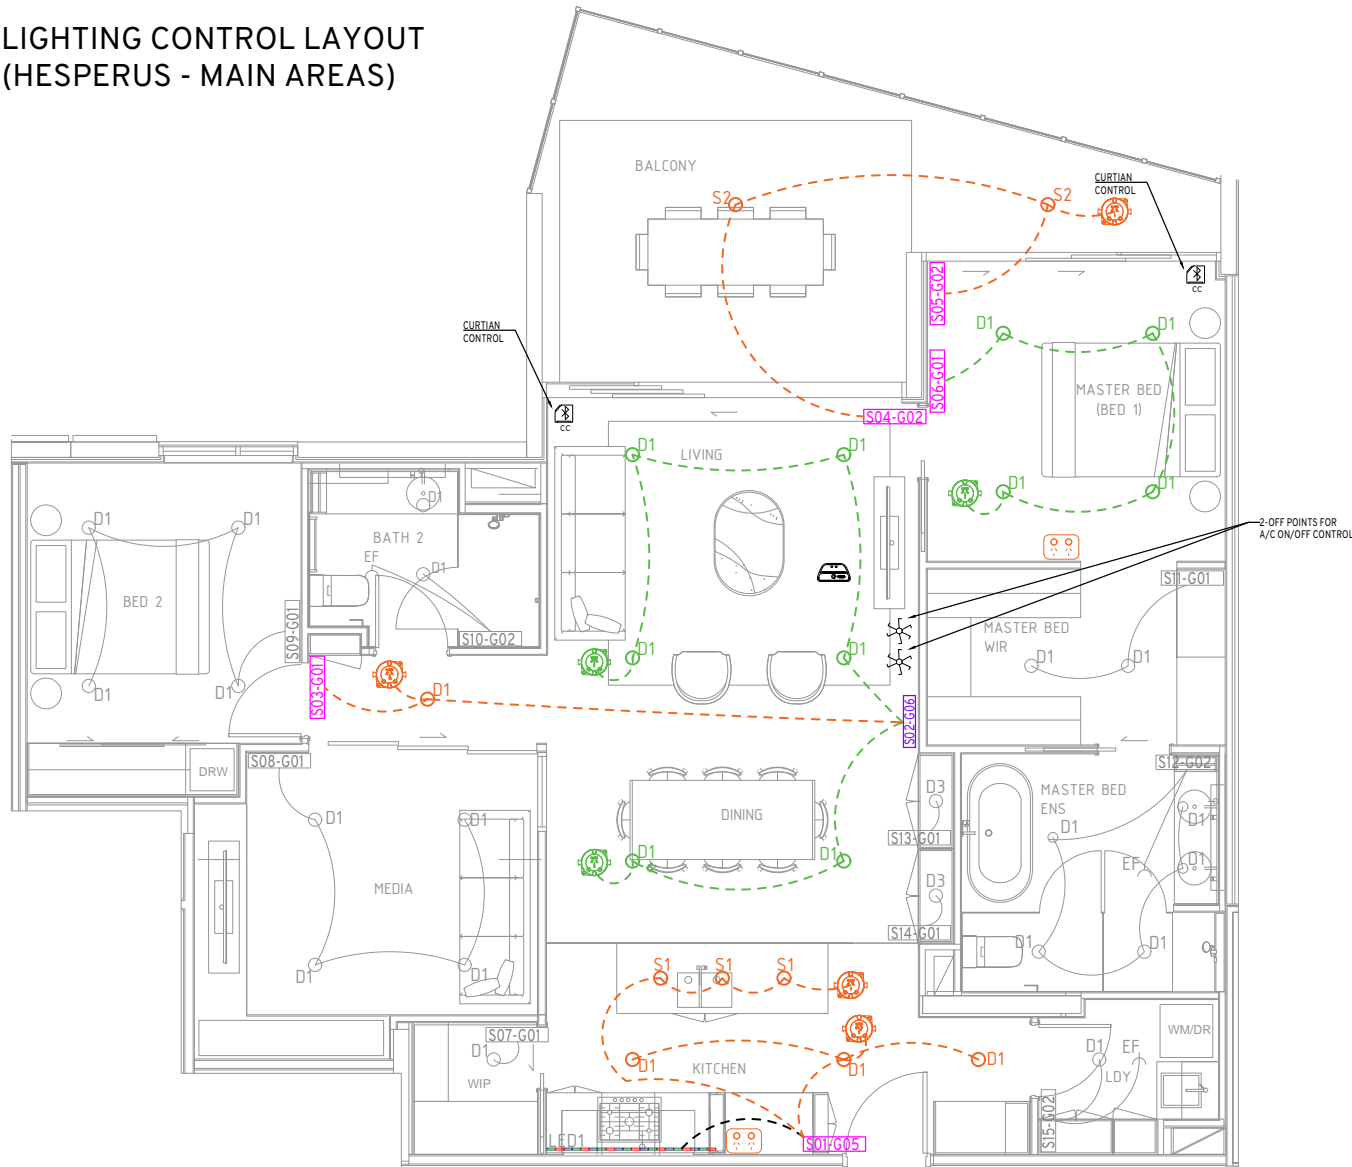

WINDOW CONTROL

Locations: Main living areas (kitchen, dining, lounge), master bedroom, master ensuite and main bathroom

Group multiple blinds and curtains for whole room control at the touch of a button. Enhance movie nights or wake up with ease with smooth, effortless control of your curtains and blinds.
