It's Under Control®

Living Enhanced 

Advanced lighting
control technology is
now available with RTI

KASTA's advanced lighting control technology is now available to integrate with RTI, offering a cost-effective solution and delivering an ultimate smart control experience.

The new KASTA Plexy™ Gateway enables integrators and owners to easily expand their lighting and control needs without being locked into traditional proprietary wiring systems and contracts. With KASTA you can control not only lights, but other devices such as fans, blinds, curtains, garage doors, gates, powerpoints, irrigation and more with your preferred automation control systems such as RTI.

Smart Lighting / IoT Award
Lighting Council Australia

KASTA SWITCH INTERFACES

Choose from our Hesperus™ Series of switch interfaces, all featuring a slim, modern glass-look design with multiple colour and configuration options to suit all interior environments. We also provide a range of complementary Unison™ 240V switches and powerpoints to complete the look in your project.
